## **AIR POLLUTION CAUSES**

Once you have watched the video, answer the following questions:

Tip: You should be able to answer them with the information given within the first two minutes of the video.

- Which are the main health consequences of air pollution?
- How many air pollution sources are mentioned? Which are these sources?
- List the primary air pollutants.

Now that you know which the primary air pollutants are, think about the direct sources of the pollutants. Write them down or make a discussion with your peers.

Play the video again to check your answers.
