

## **AIR POLLUTION CONSEQUENCES**

The following table shows the secondary pollutants mentioned in the video.

Complete the table with the main ideas you remember regarding these problematics. Express these concepts using “cause and effect” expressions.

|                             |
|-----------------------------|
| <i>Secondary pollutants</i> |
| <i>ACID RAIN</i>            |
| <i>PHOTOCHEMICAL SMOG</i>   |
| <i>TROPOSPHERIC OZONE</i>   |

Compare your notes with those of your peers (if possible) paying particular attention to the different “cause and effect” expressions used.

Play the video again to check if you were able to get the main ideas of the topic. Complete the table with the missing concepts (if necessary).
